April 6, 2006

Ref: 8EPR-SR

Mr. and Mrs. Jorgenson
79 Pine Street
Libby, Montana 59923

Dear Mr. and Mrs. Jorgenson,

This purpose of this letter is to provide you information regarding Libby Amphibole (LA) asbestos removal activities scheduled to occur at 79 Pine Street, Libby, Montana. The U.S. Environmental Protection Agency (EPA) has produced a work plan detailing LA asbestos removal activities and construction was scheduled to begin April 19 and last through May 5, 2006.

At this time, Mrs. Jorgenson has asked that the removal activities at the property be placed on hold. In the event that removal activities do not take place as scheduled, it is unlikely work at your property will be completed in 2006 due to the preset construction schedule. Further, EPA cannot guarantee removal activity funding will be available in subsequent years if and when you (or new property owners) request the work to be rescheduled.

If you decide to move forward with the clean up at your property, please send a written response to Kim Fox, your Community Involvement Coordinator (CIC), **by Wednesday, April 12, 2006**. If we do not receive communication from you, your property will be removed from the construction schedule as you previously requested.

If you have further questions regarding the clean up at your property, please feel free to contact Ms. Fox at (406)291-1460 or contact the EPA Information Center at (406)293-6194.

Sincerely,

A handwritten signature in black ink, which appears to read "Mike Cirian" with a stylized flourish at the end.

Mike Cirian, P.E.
EPA Remedial Project Manager
